

Opinions of UP Diliman Students on Technology Copyrights and Patents

ABBY CANEDO, CARISSE DACUBA, VINCENT FIESTADA, AREL LATOGA, and TROI LOBATON, University of the Philippines Diliman

In this paper, the authors take a look at the popular opinion of University of the Philippines Diliman Students, particularly those pursuing Engineering and Science degrees, regarding technological copyrights and patents. In particular, this paper examines their opinions on the extent of influence that a particular piece of design or feature has on a whole product. This is done in the context of the Samsung vs. Apple and Oracle vs. Google trials about their similar products.

Categories and Subject Descriptors: Ethical and Professional Issues [**Technology and Computing**]: Popular views and opinions—*Surveys and Analysis*
