

Software Copyrights and Patents Survey

Abby Cañedo Carisse Dacuba Vincent Fiestada
Arel Latoga Troi Lobaton

September 2016

In this paper, the authors take a look at the opinions of University of the Philippines Diliman Students, particularly those pursuing Engineering and Science degrees, regarding software copyrights and patents. In particular, we examine their opinions on the extent of influence that a particular piece of design or feature has on a whole product. This is done in the context of the Samsung vs. Apple and Oracle vs. Google trials about their similar products.

Introduction

Software copyrights and patents open up an important issue in the computing and technology industry.

Objective of the Study

We want to pass CS 196.

Methodology

We made surveys. We used ****Opportunity Sampling****.

Results

Graph. Analysis. Whatevs.

Conclusion

People hate answering long surveys.
